About

Data Analyst with experience in data validation, cleaning, transformation, reporting, and dashboard development across enterprise and analytical environments. Skilled in SQL, Python, Power BI, Tableau, and Advanced Excel, with hands-on experience using Pandas, NumPy, DAX, and MySQL for data analysis and visualization. Experienced in working with structured datasets, developing KPI dashboards, identifying data inconsistencies, and supporting data-driven reporting through analytical projects and workflow processes.

Work Experience

Tata Consultancy Services | Mumbai, India Sep 2025 - Present

Software Configuration Expert (SCE)

- Process and validate **100K–500K candidate records** using Excel and Python, performing data cleaning, formatting, validation, and consistency checks to support accurate examination workflows.
- Automate repetitive data-processing and validation tasks using **Python, Pandas, NumPy, and Excel-processing libraries**, improving processing efficiency and reducing manual effort.
- Apply rule-based analysis to candidate preference and test-center availability data to support accurate candidate-to-center allocation and minimize allocation inconsistencies.
- Use **SQL queries involving joins, filtering, and subqueries** to retrieve and validate test-center information from backend databases for integration into candidate admit cards.
- Coordinate with Project Managers and cross-functional teams to translate requirements into data-processing activities, resolve data discrepancies, and ensure accurate delivery of candidate and admit-card data.

Data Analyst Intern **Jul 2024 – Jun 2025**

- Analyzed and cleaned **100K+ healthcare records** using MySQL, applying filtering, aggregations, joins, subqueries, and conditional logic to identify disease patterns and mortality-related trends.
- Built interactive **Power BI dashboards** by combining multiple Excel datasets, performing data transformation with Power Query and creating DAX measures for KPI analysis and visualization.
- Processed and analyzed **300K+ COVID-19 records** using Python and data analysis libraries to clean, transform, and explore trends across regions and time periods.
- Developed analytical case studies and presented findings through SQL analysis, dashboards, and data visualizations to support data-driven insights.

Education

Karmaveer Bhaurao Patil College **June 2022 - Apr 2025**

Bachelor of Science (Information Technology) ***CGPA: 7.83***

Project Work

- **Health Metrics | MySQL:**

  Analyzed **100K+ healthcare records** using SQL joins, aggregations, filtering, and subqueries to identify disease patterns, and key healthcare metrics.
- **Cricket Insights | Power BI:**

  Analyzed **636 IPL matches and 150K+ delivery records** using Power Query and DAX to develop interactive dashboards covering player performance, match outcomes, and season trends.
- **Pandemic Trends | Python:**

  Processed **300K+ COVID-19 records** using Python for data cleaning, transformation, and analysis of regional and time-series trends.

Technical Skills

- **Python:** Pandas, NumPy, Data Cleaning, Data Validation, Exploratory Data Analysis
- **SQL & Databases:** SQL, MySQL, Joins, Aggregations, Subqueries, CASE Statements
- **Data Visualization:** Power BI, DAX, Dashboard Development, KPI Reporting, Data Visualization
- **Excel:** Advanced Excel, Lookup Functions, Pivot Tables, Conditional Formatting, Data Validation, VBA
